Education

2023 – Present	PhD in Computational Science, Engineering, and Mathematics Oden Institute, University of Texas at Austin; Austin, TX Advisor: George Biros
2023 – 2026	MS in Computational Science, Engineering, and Mathematics Oden Institute, University of Texas at Austin; Austin, TX
2019 – 2023	BSLAS in Mathematics & Computer Science University of Illinois at Urbana-Champaign; Champaign, IL

Research Experience

2023 – Present	Graduate Research Assistant – Efficient Numerical Simulations of Blood Flow George Biros, Mechanical Engineering University of Texas at Austin
2025, August – 2025, October	Research Intern – GPU Algorithms for Tensor Compression Eric Phipps & Sivasankaran Rajamanickam Sandia National Laboratory

Undergraduate Students

2026, January – 2026, May	Max Feldman (UT Austin) PyKokkos GPU kernels for randomized k -nearest neighbors.

Software

My open-source software contributions are made from the [kennykos](https://kennykos.github.io) GitHub account.

<code>ut-padas/ parki</code>	Project maintainer and lead contributor. Developed CPU/GPU Ewald summation algorithms for the Stokes and Laplace kernels in different periodic regimes.
<code>kokkos/ pykokkos</code>	Project collaborator and top 10 contributor. Implemented functionality for mathematical special functions, automatic just-in-time (JIT) recompilation, CMake JIT compilation, building and installing on MacOS and AMD GPUs, documentation and continuous integration.
<code>sandialabs/ GenTen</code>	Implemented a matrix-free MTTKRP for dense tensors: <code>MTTKRP_Dense_Perm_Kernel</code> , the basis for the publication <i>A Performance Portable Matrix Free Dense MTTKRP in GenTen</i> .
